SUMMARY

Aspiring software engineer with a strong foundation in programming and problem-solving. Passionate about developing efficient, scalable solutions and eager to contribute to innovative projects.

SKILLS

- **Programming Languages:** Python, C++
 - **Frameworks/Tools:** Git, Visual Studio Code, etc.
 - **Technical Skills:** Software development, Data Analytics
 - **Soft Skills:** Communication, teamwork, problem-solving
-

EDUCATION

B.Sc. Computer Science (Honors)

University of Delhi

(2022 – 2026)

Major in **Computer Science**

PROJECTS

Amit Bearing Store

- **Technologies Used:** HTML, CSS, Bootstrap
- Developed a responsive website for a bearing store, showcasing the store's offerings and contact details. Implemented clean UI/UX design principles.

Amit GroceryMart

- **Technologies Used:** Python
- Designed a graphical user interface (GUI) application for grocery management, including a dynamic menu system for better usability.

Quiz Game

- **Technologies Used:** Python
- Created an interactive quiz game application with multiple categories and scoring logic. Enhanced user engagement through a user-friendly interface.

Hangman Game

- **Technologies Used:** Python
- Built a word-guessing game using Python, including random word generation and real-time feedback for correct/incorrect guesses.

Kajal's Portfolio

- **Technologies Used:** HTML, CSS, Bootstrap
- Designed and developed a personal portfolio webpage to showcase skills, projects, and achievements with a modern, responsive design.
